Reflection

1. Since the bright green might be hard to read paired with the white background, I decided to change the color to a darker shade of green (line 33)

```
33          centerLabel.setForeground(new Color(0, 150, 0));
```

2. Added a rollCount and totalSum to make it easier for user to restart the roll of the dice (line 16, 77, 98)

```
16      private int rollCount = 0;
```

```
76      private void finishRoll(int diceValue) {
77          rollCount++;
78          totalSum += diceValue;
79          double average = (double) totalSum / rollCount;
```

```
97      private void resetStats() {
98          rollCount = 0;
99          totalSum = 0;
100         topLabel.setText("已擲 0 次，總和 0，平均 0.00");
101         centerLabel.setText("-");
102         centerLabel.setForeground(Color.BLACK);
103     }
```
